

# Disclosure of Best Execution Policies

December, 2017

## **Integral Wealth Securities Limited (IWSL)**

The information contained herein is proprietary to IWSL and may not be used, reproduced or disclosed to others except as specifically permitted in writing by the originator of the information. The recipient of this information, by its retention and use, agrees to protect the same and the information contained therein from loss, theft and compromise. Any copies of this document which are no longer required in company approved retention systems must be disposed of by means in which the trustee of the copy guarantees its complete destruction.

#### Introduction

This document sets out Integral Wealth Securities Limited (IWSL) obligations, factors, order handling and routing practices intended to achieve best execution for client orders for listed securities, as outlined in IIROC Dealer Member Rule 3300.

As per IIROC Dealer Member Rule 3300.2, IWSL will establish, maintain and ensure compliance with written policies and procedures that are reasonably designed to achieve best execution when acting for a client.

Pursuant to Rule 3300.1, "Best Execution" means obtaining the most advantageous execution terms reasonably available under the circumstances.

Pursuant to Rule 3300.10, despite any instruction or consent of the client, achieving best execution for a client order for any listed security is subject to compliance with the Order Protection Rule under Part 6 of the Trading Rules by:

- (a) The marketplace on which the order is entered; or,
- (b) The Dealer Member, if the Dealer Member has marked the order as a "direct-action order", in accordance with the Universal Market Integrity Rules (UMIR), sub-section 6.2.

#### **Best Execution Factors**

IWSL considers the following factors for the purpose of achieving best execution for all client orders, pursuant to Rule 3300.3, sub-section (a):

- (1) Price
- (2) Speed of Execution
- (3) Certainty of Execution
- (4) The overall cost of the transaction, when costs are passed on to clients

IWSL may pay marketplace fees or receive marketplace rebates when routing orders to certain marketplaces. The fee schedules of each marketplace are available on their respective websites.

IWSL considers the following sub-factors, which encompass more specific considerations of the broad factors listed above.

- (i) Considerations taken into account when determining appropriate routing strategies for clients
- (ii) Considerations of the fair pricing of Opening Orders when determining where to enter an Opening Order
- (iii) Considerations when not all marketplaces are open and available for trading
- (iv) How order and trade information from all appropriate marketplaces, including unprotected marketplaces and foreign organized regulated markets (FORMs), is taken into account
- (v) Factors related to executing on unprotected marketplaces
- (vi) Factors related to sending orders to a foreign intermediary for execution

IWSL receives order, pricing and trade information for protected and unprotected Canadian markets and FORMS via market data, OMS/EMS vendors and best execution providers.

IWSL may trade actively, by taking liquidity, on unprotected marketplaces. Due to the potential for trade throughs of visible quotes on unprotected marketplaces, IWSL may elect to not rest flow passively on these venues. If an unprotected marketplace has shown the ability to positively affect the desired factors IWSL considers for best execution, an unprotected marketplace may be used for passive posting, in a routing/order handling strategy

IWSL will not send listed securities in bulk to a foreign intermediary for execution outside of Canada without considering other liquidity sources, including liquidity sources in Canada.

IWSL considers the following "prevailing market conditions" when manually handling a client order for a listed security or a foreign exchange-traded security that trades on a marketplace in Canada, pursuant to Rule 3300.3, sub-section (c):

- (i) The direction of the market for the security;
- (ii) The depth of the posted market;
- (iii) The last sale price and the prices and volumes of previous trades;
- (iv) The size of the spread; and

#### (v) The liquidity of the security.

## **Order Handling and Routing Practices**

Marketplace: IWSL may access exchanges, ATS's (protected and unprotected), dark markets and OTC in the pursuit of best execution.

The broad best execution factors, as well as the following considerations, will be used to select and rank venues. More specific factors will be considered when handling orders with unique circumstances, such as market opening and closing, unique client direction and requirements, and venues that may have specific unique attributes that may assist in best execution.

Venues will be selected, ranked and graded based on:

- Experience
- Analysis
- Direct market data consumption
- Research

IWSL is as member/subscriber of the marketplaces listed in **Schedule A**, and may route orders directly to any of the marketplaces listed.

<u>Intermediaries:</u> IWSL utilizes the services of a number of foreign and domestic intermediaries, either directly or through our carrying broker Fidelity Clearing Canada ULC, to achieve best execution. These intermediaries offer technology solutions for electronic and algorithmic trading, and specialized liquidity services. IWSL may elect to route orders to an intermediary when one or more of IWSL's best execution factors are deemed to be improved. IWSL may also elect to use an intermediary to access a marketplace where we are not a member/subscriber. IWSL will weigh the benefit in using an intermediary against potential settlement or FX exposure risk, if any.

Intermediaries are listed in Schedule B.

If any of the orders are routed to any of the above listed intermediaries, pursuant to an arrangement with any such intermediary, the order will be subject to the order handling and routing practices of the intermediary. IWSL is deemed to have reviewed the order handling and routing practices of the intermediary and is satisfied that they are reasonably designed to achieve best execution.

IWSL may pay marketplace fees or receive marketplace rebates when routing certain orders to certain marketplaces. Marketplace fee schedules are disclosed on the websites of each marketplace. Based on client agreements and disclosures, IWSL may or may not pass on certain costs or compensation received to its clients. Routing decisions are not primarily made based on fees paid or payments received.

IWSL will consider instructions of a client, subject to compliance with any regulatory requirement.

If specific trading or handling instructions are received from the client, IWSL will take these instructions into account when trading and handling the order. If these instructions compromise IWSL's obligations, the order may be returned to the client for clarification or may be rejected.

IWSL may elect to move an order entered on one marketplace to another marketplace, if the determination is made that best execution can be more readily achieved.

A decision to move one or many orders from the original marketplaces will be weighed against order priority factors and the potential for partial fills.

IWSL recognizes that potential or perceived conflicts of interest may have a negative impact on investor confidence. IWSL treats seriously the management of all potential conflicts of interest. IWSL's relationship with its affiliate in the United States, FCM, represents a potential conflict of interest. IWSL Trading operates in a fair, orderly and transparent manner, and pledges to not prioritize one order flow over another. This aim will not be overridden by any commercial interests of either IWSL or its affiliates such as FCM. Any potential conflicts of interest will be actively mitigated on an ongoing basis through best execution testing measures (described in greater detail below). Should inferior results be obtained, IWSL will amend order handling accordingly to ensure adherence to best execution standards.

## **Default Order Handling Protocols**

The trading day consists of three sessions:

- *Pre-open*: the session ending with the opening of the primary Canadian listing marketplace at 9:30 AM EST
- Continuous Session: The main session of the primary Canadian listing marketplace, 9:30 AM to 4:00 PM, plus Extended Trading Session 4:15 PM to 5:00 PM. Trades conducted at last sale price of primary Canadian listing marketplace.
- Post Close: The session starting with the closing of the primary Canadian listing marketplace.

IWSL supports trading in both the pre-open and the post-close. Trading in these sessions is handled in accordance with this policy and specific client instructions are required for participation. By default, orders received in the pre-open are queued for execution at 9:30 AM, and will be routed to the primary Canadian listing marketplace or will target the opening price on that marketplace. By default, orders received in the post-close are queued for the opening of the primary Canadian listing marketplace on the following business day. An order received during the continuous session is handled following this policy, and routed appropriately for best execution at the time of entry.

IWSL Trading will follow the holiday calendar of the primary Canadian listing marketplace for Canadian orders, and the holiday calendar of the primary US listing marketplace for US orders.

Each Canadian marketplace supports a variety of order types. These include order types or designations required by the regulators. A summary document which outlines the order types and features available is obtainable upon request.

IWSL does not permit on stop orders which are triggered to a market order. IWSL trading tools mandate a secondary limit is placed on each on-stop order.

Trade execution details are available via trade confirmation, electronically via FIX and/or upon request. This includes marketplace execution details, execution capacity and average price details.

At all times IWSL pricing of OTC securities will be fair and will reflect the size, the total cost and difficulty of the particular transaction. Markups and markdowns and total pricing will reflect the scarcity of the issue, the work that is required to trade, clear and settle the overall transaction as well as market forces. Best execution, as well as order routing table maintenance, is governed and reviewed by IWSL's Trade Review Committee (TRC). The TRC meets monthly at a minimum, or periodically as needed, and is responsible for the oversight and supervision of all items relating to trading at IWSL.

Membership is composed of a number of senior executive members including Trading, Compliance and Operations.

Changes to order routing procedures, the ranking of marketplaces for active and passive routing, along with other trading, risk and regulatory topics are discussed and approved by the TRC.
